About This Trip •

Hampta Pass Trek Overview

Hampta Pass Trek is renowned for being one of the most accessible and convenient treks in Himachal Pradesh. It is a gateway between Manali Valley and Spiti Valley, offering breathtaking views and various landscapes. The trek is characterised by its scenic beauty, which includes expansive meadows, glacial valleys, and stunning pass crossings, making it a memorable adventure. Chandratal Lake, situated at around 14,000 feet, is a significant highlight of the trek. The optimal times to undertake this trek are May to July and August to October. The pass is famous for its snow coverage, even during summer, which attracts many trekkers. The entire trek spans approximately 26 kilometres.

Unique Features of Hampta Pass

Hampta Pass, perched at about 14,010 feet on the Pir Panjal range, is a remarkably high-altitude pass. Named after the nearby Hampta Village, it is a corridor between the lush Kullu Valley and the stark Lahaul Valley. The pass offers a dramatic landscape shift, with verdant valleys on one side and barren, rugged terrain on the other. This stark contrast provides a unique and exhilarating trekking experience featuring vertical rock walls, waterfalls, glaciers, and lofty peaks. From the pass, a trail leads to the mesmerising Chandratal Lake, known for its turquoise waters.

Dramatic Himalayan Trek

At 14,000 feet, Hampta Pass is renowned for being one of the most breathtakingly dramatic mountain passes in the Himalayas. On one side, trekkers encounter the lush, green Kullu Valley with its forests, meadows, and vibrant flowers. On the opposite side lies the almost barren Lahaul Valley, characterised by its stark, arid landscape. Standing atop Hampta Pass, the difference between the two worlds is striking and shifts rapidly.

Often compared to the Valley of Flowers due to its vibrant green landscapes, Hampta Pass offers an additional bonus of dramatic contrasts. The transition from the lush green meadows to the rugged, arid terrain of Spiti Valley is a sight to behold. The trek is filled with adventure, challenging climbs, and the thrill of crossing the pass. Trekkers will encounter stunning flora, including Himalayan Blue Poppies and Pink Hill Geraniums, and witness changing forest types from apple orchards to deodar and oak trees.
